==========
EVIDENCE OF SYSTEMATIC DIGITAL SUPPRESSION
AND TARGETING OF A CANDIDATE
==========

Prepared by: Timothy David Geisler (XAirForce)
Date: June 29, 2025

==========
Section A: DECLARATION
==========

I, Timothy David Geisler, publicly known as Timothy (XAirForce) Geisler, am a former United States Air Force service member with a classified background in strategic nuclear forces. I previously held a Top Secret/Sensitive Compartmented Information (TS/SCI) clearance and was part of the Personnel Reliability Program (PRP).

I hereby formally document that my presidential campaign - launched in 2019 - has been systematically suppressed through a coordinated effort involving government agencies, major corporations, and digital platforms.

This targeting has included:
- Suppression of my digital identity
- Deletion or throttling of my content on public platforms
- Denial of access to communication tools
- Targeted property damage and surveillance
- Election interference with retaliation against reporting

==========
Section B: DIGITAL EVIDENCE
==========

The following table documents platforms where I am active and verifiably suppressed:

Platform	Status	Notes
YouTube	Active, Not Indexed	Channel and posts exist, but not searchable or discoverable
Substack	Active, Not Searchable	Profile visible only when logged in
Archive.org	Active, Not Indexed	Profile exists but is unlisted in Google index

2400z.com | Live Site, Not Indexed | No metadata, not discoverable by search
Twitter | Accounts Removed | 3 accounts removed during presidential run
Gmail / USAA | Documented Claims | Email alleging targeted harassment filed (screenshot proof)
Quora | Public Whistleblowing | Posts made about suppression and institutional involvement

==========
Section C: LEGAL AND SCHOLARLY CONTEXT
==========

Numerous expert sources and legal precedents validate that algorithmic suppression and digital interference pose serious threats to democracy and political liberty:

- Zeynep Tufekci (2017) - Twitter and Tear Gas
  Demonstrates how protest movements are algorithmically undermined.

- Safiya Noble (2018) - Algorithms of Oppression
  Documents how search results are manipulated to erase dissenting voices.

- Sarah T. Roberts (2019) - Behind the Screen
  Exposes content moderation systems suppressing whistleblowers.

- Frank Pasquale (2015) - The Black Box Society
  Shows how opaque data systems influence elections and civil liberties.

==========
Section D: SUBMISSION PLAN & CALL TO ACTION
==========

This dossier - with full documentation and screenshots - may be submitted to:

Civil Liberties Groups:
- Electronic Frontier Foundation (EFF)
- ACLU
- Freedom of the Press Foundation

Investigative Journalism:
- ProPublica
- The Intercept
- Consortium News
- Project Censored

Oversight & Legal Bodies:
- U.S. House Oversight Committee
- U.N. Special Rapporteur on Free Expression
- International Criminal Court (if abuse rises to that level)

Attached evidence files and screenshots should be included as part of the full submission. This document is prepared in good faith and represents factual events as documented by the creator.
